Art Unit: 1756

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-23, drawn to photoreceptors, an image forming apparatus, and a process cartridge, classified in class 430, subclass 58.7, class 399, subclass 159, and class 399, subclass 116, respectively.

II. Claims 24-26, drawn to methods of making a photoreceptor, classified in class 430, subclass 134.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed can be made by a materially different process, such as a process comprising the steps of forming a charge generation layer coating liquid comprising a dispersion of a titanyl phthalocyanine having an average particle size of 0.2 micron without filtering the coating liquid, coating said unfiltered liquid on an electroconductive

Art Unit: 1756

substrate having a surface roughness of 1.0 micron to form a charge generation layer, and coating the charge generation layer with a charge transport layer coating liquid. See example 1 at pages 73-74, of the instant specification. Such a process does not require filtering the charge generation coating liquid as required in the process of Invention II.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, and as shown by their different classification, restriction for examination purposes as indicated is proper.

3. A telephone call was made to Mr. F. Vastine (Reg. No. 27,013) on Oct. 22, 2004, to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicants are advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. Applicants are reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be

Art Unit: 1756

amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Janis L. Dote whose telephone number is (571) 272-1382. The examiner can normally be reached Monday through Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mr. Mark Huff, can be reached on (571) 272-1385. The central fax phone number is (703) 872-9306.

Any inquiry regarding papers not received regarding this communication or earlier communications should be directed to Supervisory Application Examiner Ms. Claudia Sullivan, whose telephone number is (571) 272-1052.
